

- The workshop's teachings on the integration of robustness thinking and lean thinking were truly remarkable. Particularly, the concept of robustness caught my attention, along with the discussion on Design of Experiments (DOE), which inspired me to delve deeper into this subject.
- I wanted to express my sincere appreciation for organizing an exceptional Green Belt Lean Six Sigma course. The experience provided me with a wealth of tools that have greatly enhanced my professional problem-solving skills. I hope to see continued collaboration between Tailored Brands and UH in the future, with opportunities such as student visits to DC and beyond that could significantly impact the lives of our future professionals.
- Dr. Hu, your dedication and time invested in providing this exceptional Green Belt LSS training are deeply appreciated. Let's continue the momentum of the Tailored & UH partnership and explore further collaboration on future initiatives.
- The workshop was an invaluable learning experience, allowing me to grasp the importance of both lean and robustness thinking in critical decision-making processes. Overall, the experience was incredibly memorable and has significantly influenced my high-level thinking.
- The balance between theoretical knowledge and practical application in the workshop was perfect. The case studies provided real-life examples that enhanced my understanding of implementing Six Sigma methodologies.
- Although the workshop was only three days long, it was guided by an exceptional mentor and has left a lasting impression on me. I am genuinely appreciative of the knowledge gained in such a short period.
- This has been the most beneficial three days I have encountered since arriving in the USA, and I eagerly anticipate continuing my journey with further certifications in the future.
- Engaging with the workshop case studies was particularly enjoyable, as they provided a bridge between theory and real-life professional experiences. It's a fantastic way to make a tangible impact in the business world.
- My gratitude for the LSS project-driven hands-on workshop, which significantly expanded my understanding of robustness thinking and robust design in problem-solving.
